### Office Hours

Mon: 8:00am - 4:30pm  
Tue: 8:00am - 4:30pm  
Wed: 8:00am - 4:30pm  
Thu: 8:00am - 4:30pm  
Fri: 8:00am - 4:30pm

## Laser Therapy is Now Available at Northside Podiatry

MLS Laser Therapy is an effective, painless treatment for all types of pain relief that has been cleared by the FDA and proven successful as evidenced by extensive and credible research studies conducted in our country's finest institutions, including Harvard Medical School.

Our laser is a dual-waved synchronized fully robotic MLS Laser. Our laser uses specific wavelengths of light that have a strong anti-inflammatory, anti-edema effect on tissues that are exposed to the laser. As a result of the MLS Laser, the cells of tendons, ligaments and muscles repair themselves faster. In simple terms, laser energy kick-starts the healing process, thereby speeding recovery. No matter if you have long standing pain from prior foot or ankle surgery or injury, foot or ankle arthritis, or you have a new injury our laser therapy has been proven to work.

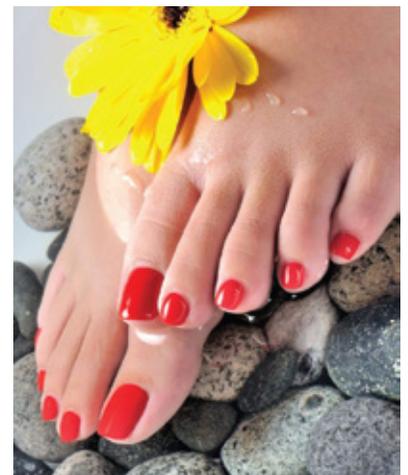

Here is what you need to do now. Call our office at **404-843-0090** to set-up an appointment to see if MLS Laser is right for you.

## A 2017 Resolution You Can Keep: Take Care of Your Feet

The holidays are all about traditions. Did you watch the Times Square crystal ball drop or maybe enjoy a local fireworks show? Or did you celebrate with a quiet evening at home with family and friends?

Although we celebrate the New Year with many diverse traditions, there is one thing that most of us have in common - we make resolutions for the coming year. If you've resolved to take better care of your health, don't forget that foot health is a major wellness component.

Resolve to take good care of your feet in 2017 with these simple steps: ....continued on page 2

## ....continued from page 1 **A 2017 Resolution You....**

### **History FootNote**

People make New Year's resolutions all over the world. The ancient Babylonians first made resolutions 4,000 years ago, promising to pay their debts and return any borrowed items!

### **Celebrity Foot Focus**

Point guard George Hill of the Utah Jazz was recently sidelined for at least one game due to a sprained big toe.

### **Find Us On Facebook**

- Protect your feet with comfortable, sturdy shoes, boots and sandals. Save your flip-flops for poolside and the beach. Don't forget to apply sunscreen to your feet too.
- Clean your feet every day with soapy water and dry thoroughly, especially between the toes.
- Soothe after washing by applying a rich foot lotion or cream - but not between the toes. Moisturize toenails with cuticle cream or petroleum jelly.
- Invest in your feet with new, well made shoes with plenty of support. Shop later in the day when feet are largest and measure both feet each time. Give your toes plenty of wiggle room.
- Trim toenails straight across to prevent ingrown toenails - don't round at the edges.
- Check your feet every day, especially if you have diabetes. Look for foot fungus or any type of damage like cracked skin, abrasions or puncture wounds that are not healing.
- Stretch your feet and ankles along with the rest of your body to keep them flexible and help prevent injury.
- Put your feet up often during the day to help your circulation and take pressure off muscles and tendons.

For patients with diabetes, please add one more resolution. Come in to our office regularly - at least once a year - for a thorough checkup. It's important to check for neuropathy by testing for loss of sensation. We'll also assess your overall foot health and inspect your feet closely for any sign of injury. Left untreated, any foot damage can lead to serious problems in those with diabetes.

We wish all our patients and their families a very Happy and Healthy New Year!

## **All About Toes**

Our toes are engineering marvels of bone, tendons and muscles and they really take a beating! They are constantly exposed to injury with walking, running or just moving around. And the pressures inside our shoes can cramp the toes and lead to stress-related problems.

If you have toe discomfort, there are many different causes that we will look for. First we'll ask you what type of pain you have - is it a burning feeling or numbness? Sharp or dull? Does it get worse when you're walking or standing?

Here are a few common causes of toe pain:

....continued on page 3

- Ingrown toenails where the nail cuts into the adjacent skin and often becomes infected.
- Bunions can form when the big toe is pushed up against the others. Bunions can be hereditary or can result from wearing tight, narrow shoes.
- Corns and calluses develop from excess friction and pressure on the skin.
- Arthritis, whether caused by wear and tear or rheumatoid arthritis, causes tenderness, stiffness and difficulty walking. Gout, a painful buildup of uric acid crystals in the joints, is a form of arthritis.
- Hammertoes and claw toes are abnormal bends in the toe joints caused by muscle imbalance. Poorly fitting shoes is often the cause for these painful deformities.
- Morton's neuroma is a nerve problem that causes pain between the toes caused by trauma or excessive pressure from tight shoes.
- Capsulitis causes pain and swelling in the toes or ball of the foot caused by inflammation of the ligaments.

Please come see us if you have persistent toe pain as these conditions will not go away by themselves.

### Joke of the month

Q: How do Eskimos make their beds?

A: With sheets of ice and blankets of snow.

### Trivia

*January has 31 days. How many other months also have 31 days?*

- A. Five
- B. Six
- C. Seven
- D. Eight

Answer: C
